Del., and the direction of Paul Mill Plum tarts-Mix two cupfuls of flour, a tablespoonful of sugar, half a teaspoonful of salt and cut into this three-quarters of a cupful of butroll very thin, and bake in small tart shells. Fill with plum preserves.

HOW TO HAVE GOOD PASTURE

octor results in pasturing are obtained early in the season on burned-over fields, the ultimate effect upon the stand of grass, and especially of the choice forage stand, is bound to be bad. The burning cannot help destroying the crowns of many of the plants and also much of the season the plants and also much of the season without any protection from the previous year, as well as any plantlets without any protection from the previous year's crops, together with early grazing while the soil is damp, provides ideal conditions for the weakening of many plants of many provides ideal conditions for the weakening of many plants of ma

weakening of many plants and the total elimination of the choicest, ten-derest of them soonor or later under the burning system of pasture man-

"Some work has been done in mowing to control weed growth. Results to date indicate that weeds can be effectively controlled, especially on the level areas where weeds are growing to the exclusion of all forage plants. Where the grass stand is good and the weeds are few, mowing has been detrimental to the growth of grass even when cut as late as August 15."

Bigelow. This writer describes a model "community observatory" which has been built under his direction at Sound Beach, Conn., by means of funds collected from many friends of seince, and points out how much more valuable such an institution is in an educational way than the ordinary type of observatory. He suggests that every community ought to have a small observatory for the use

ing trial flights over Lake Constance according to a report reaching Zuscopes would be preferable to one large one. The observatory at Sound on the lake. The total capacity is believed by observers to be 54,000 cubic meters, or about double that of Zeppelins of the earlier type. The weight of the new craft is estimated at 40 tons, and it is fitted with seven motors, four armored gendolas, machine guns, and bomb and aerial torpedo apparatus. The report is interesting; but is it autentic?

Would be visible. Several small televities one landing men is not kinds of birds.

Birds Help Defeat Germany.
Food is needed for our armies.
Birds help the farmers produce that food by destroying insect pests.
Therefore birds may be considered as one of the allies. In the August Farm and Fireside we read:
"Birds are almost as busy as bees, and their work in increasing crop yields is highly the state of the same of the sound that he soup. The Childs people aked proof and Despited the same of t

and their work in increasing crop yields is highly important. One of the cheapest and most effective ways to fight insect pests that annually take crop toll estimated at \$300,000,-1000 is to aid in the preservation of blird life. Few people realize how bird life. Few people realize how many insects are destroyed by birds. A teaspoonful of chinch bugs has been taken from the crop of one quail, and an adult bird has been known to eat 5,000 plant lice in two marched two blocks and a police-man shooed them home. hours. Such worms and bugs as infest our gardens are favorite food for bluebirds, robins, and many other kinds of birds.
